

# Sysadmin and cloud dev

Ea Energy Analyses is looking for a good-humored IT system administrator and specialist to develop our IT solutions

## The job

Ea Energy Analyses

At Ea Energy Analyses, you are responsible for our critical IT systems and have a central role in the innovation of how we use IT.

Your work has two main components:

- As overall responsible for IT, you ensure that all our on-premise and cloud IT platforms operate and perform. You are responsible for internal IT and are supported by talented IT students to provide user support. You are point-of-contact to external IT-support and outsourced systems administration.
- As full stack developer, you take lead in the development of customized tools from MS Excel add-ins (C#) to outward facing cloud platforms, and in finding opportunities for value creation on top of our consulting services using IT. Recent examples include an online training platform and a cloud-based infrastructure for energy system modelling.

## Your profile

As our ideal candidate, you are a helpful colleague with solid people skills, undeterred by pressure from deadlines etc. You have a strong background in IT with:

- Working experience including C#, PowerShell, T-SQL, etc.
- Experience and certifications working with Microsoft Azure architecture/design, Azure functions, Azure management.
- A track record in system administration, Active Directory administration, Hyper-V management, back-up etc.
- The disposition to combine the roles of system administrator with development, and passion and curiosity for finding new ways of using IT.

## Ea Energy Analyses

Ea Energy Analyses provides consulting services, performs research, and develops models in the field of energy and climate change. We make analyses of energy systems from technical, economic, environmental and climate perspectives.

IT systems are essential in the conduct of businesses. Our main platforms are Microsoft based, but we encourage experimentation with, and adoption of, new technologies, if they support our work.

Our company consists of 32 colleagues with significant employee influence and co-ownership. We have a cooperative culture, an informal tone, high ambitions and professional ethics.

## The practicalities

Applications will be reviewed on an ongoing basis. Please send your application and CV to [job@eaea.dk](mailto:job@eaea.dk) before 15/11/2020. You can contact Lars Bregnbæk on +45 60 39 17 06 to hear more about the position.
